IBRO Publications Committee

Chairman, A. D. SMITH; M. ITO, E. R. KANDEL, P. G. KOSTYUK, K. KRNJEVIĆ, R. LLINÁS, D. RICHTER.

Aims and Scope:

Neuroscience publishes papers describing the results of original research on any aspect of the scientific study of the nervous system. Since one of the chief aims of the journal is to promote communication between neuroscientists, the type of paper most suitable for publication is that in which new observations are clearly and succinctly reported and in which the purpose of the study is made meaningful to scientists of other disciplines. Any paper, however short, will be considered for publication provided that it reports significant, new and carefully confirmed findings with full experimental details. For *Instructions to Authors* see Vol. 21, No. 1, pp. iii–v.

Production Controller: R. L. WATSON. *Editorial Assistant:* S. J. RUSSELL.

Publishing, Subscription and Advertising Offices: Headington Hill Hall, Oxford OX3 0BW (Oxford 64881).
Published monthly (four volumes per annum).
Annual institutional rate (1987) *DM* 2700.
Two-year institutional rate (1987/88) *DM* 5130.
Personal subscription rate for those whose library subscribes at the regular rate (1987) *DM* 271.
Prices are subject to change without notice.
Members of the International Brain Research Organization may order personal subscriptions at a concessional rate and details of these rates are available on request. Airmail Subscription extra. Subscription enquiries from customers in North America should be sent to: Pergamon Journals Inc., Maxwell House, Fairview Park, Elmsford, NY 10523, U.S.A., and for the remainder of the world to: Pergamon Journals Ltd, Headington Hill Hall, Oxford OX3 0BW, U.K.

Back issues of all previously published volumes are available in the regular editions and on microfilm and microfiche. Current subscriptions are available on microfiche simultaneously with the paper edition and on microfilm on completion of the annual index at the end of the subscription year.

COMMENTARY

A. R. Crossman — Primate models of dyskinesia: the experimental approach to the study of basal ganglia-related involuntary movement disorders — 1

RESEARCH PAPERS

S. K. Kostyk and **P. Grobstein** — Neuronal organization underlying visually elicited prey orienting in the frog—I. Effects of various unilateral lesions — 41

S. K. Kostyk and **P. Grobstein** — Neuronal organization underlying visually elicited prey orienting in the frog—II. Anatomical studies on the laterality of central projections — 57

S. K. Kostyk and **P. Grobstein** — Neuronal organization underlying visually elicited prey orienting in the frog—III. Evidence for the existence of an uncrossed descending tectofugal pathway — 83

A. Pazos, A. Probst and **J. M. Palacios** — Serotonin receptors in the human brain—III. Autoradiographic mapping of serotonin-1 receptors — 97

A. Pazos, A. Probst and **J. M. Palacios** — Serotonin receptors in the human brain—IV. Autoradiographic mapping of serotonin-2 receptors — 123

M. Del Fiacco, M. C. Levanti, M. L. Dessi and **G. Zucca** — The human hippocampal formation and parahippocampal gyrus: localization of substance P-like immunoreactivity in newborn and adult post-mortem tissue — 141

G. M. Shepherd and **R. K. Brayton** — Logic operations are properties of computer-simulated interactions between excitable dendritic spines — 151

P. A. V. Anderson and **K. A. Hamilton** — Intracellular recordings from isolated salamander olfactory receptor neurons — 167

H. M. Charlton, A. J. Jones, D. Whitworth, M. J. Gibson, G. Kokoris, E. A. Zimmerman and **A. J. Silverman** — The effects of the age of intracerebroventricular grafts of normal preoptic area tissue upon pituitary and gonadal function in hypogonadal (hpg) mice — 175

R. Marchand — Histogenesis of the subthalamic nucleus — 183

I. Divac, J. Mogensen, S. Marinkovic and **R. Mårtensson** — On the projections from the neostriatum to the cerebral cortex: the "displaced" neurons — 197

I. A. Ilinsky, K. Kultas-Ilinsky, A. Rosina and **M. Haddy** — Quantitative evaluation of crossed and uncrossed projections from basal ganglia and cerebellum to the cat thalamus — 207

R. M. Harris and **A. E. Hendrickson** — Local circuit neurons in the rat ventrobasal thalamus—a GABA immunocytochemical study — 229

M. Harandi, M. Aguera, H. Gamrani, M. Didier, M. Maitre, A. Calas and **M. F. Belin** — γ-Aminobutyric acid and 5-hydroxytryptamine interrelationship in the rat nucleus raphe dorsalis: combination of radioautographic and immunocytochemical techniques at light and electron microscopy levels — 237

A. Contestabile, L. Villani, A. Fasolo, M. F. Franzoni, L. Gribaudo, O. Øktedalen and **F. Fonnum** — Topography of cholinergic and substance P pathways in the habenulo-interpeduncular system of the rat. An immunocytochemical and microchemical approach — 253

O. Häppölä, H. Päivärinta, S. Soinila, J.-Y. Wu and **P. Panula**	Localization of L-glutamate decarboxylase and GABA transaminase immunoreactivity in the sympathetic ganglia of the rat	271
O. Häppölä, S. Soinila, H. Päivärinta and **P. Panula**	[Met^5]enkephalin-Arg^6-Phe^7- and [Met^5]enkephalin-Arg^6-Gly^7-Leu^8-immunoreactive nerve fibres and neurons in the superior cervical ganglion of the rat	283
H. Schwörer, K. Racké and **H. Kilbinger**	Spontaneous release of endogenous 5-hydroxytryptamine and 5-hydroxyindoleacetic acid from the isolated vascularly perfused ileum of the guinea-pig	297
SOFTWARE SURVEY SECTION		I
VOLUME 21 NUMBER 2		MAY 1987
D. C. German, C. L. White III and **D. R. Sparkman**	Alzheimer's disease: neurofibrillary tangles in nuclei that project to the cerebral cortex	305
S. U. Walkley	Further studies on ectopic dendrite growth and other geometrical distortions of neurons in feline GM1 gangliosidosis	313
J. Hsiang, B. H. Wainer, I. A. Shalaby, P. C. Hoffman, A. Heller and **B. R. Heller**	Neurotrophic effects of hippocampal target cells on developing septal cholinergic neurons in culture	333
J. C. Holstege and **H. G. J. M. Kuypers**	Brainstem projections to lumbar motoneurons in rat—I. An ultrastructural study using autoradiography and the combination of autoradiography and horseradish peroxidase histochemistry	345
J. C. Holstege	Brainstem projections to lumbar motoneurons in rat—II. An ultrastructural study by means of the anterograde transport of wheat germ agglutinin coupled to horseradish peroxidase and using the tetramethyl benzidine reaction	369
J. R. Howe, T. L. Yaksh and **G. M. Tyce**	Intrathecal 6-hydroxydopamine or cervical spinal hemisection reduces norepinephrine content, but not the density of α_2-adrenoceptors, in the cat lumbar spinal enlargement	377
J. R. Howe, T. L. Yaksh and **V. L. W. Go**	The effect of unilateral dorsal root ganglionectomies or ventral rhizotomies on α_2-adrenoceptor binding to, and the substance P, enkephalin, and neurotensin content of, the cat lumbar spinal cord	385
E. Carstens, H. Gilly, H. Schreiber and **M. Zimmermann**	Effects of midbrain stimulation and iontophoretic application of serotonin, noradrenaline, morphine and GABA on electrical thresholds of afferent C- and A-fibre terminals in cat spinal cord	395
S. M. Strittmatter and **S. H. Snyder**	Angiotensin converting enzyme immunohistochemistry in rat brain and pituitary gland: correlation of isozyme type with cellular localization	407
M. Alexandrova, M. Holzbauer, K. Racke and **D. F. Sharman**	Acetylcholinesterase in the rat neurohypophysis is decreased after dehydration and released by stimulation of the pituitary stalk	421
B. Rouzaire-Dubois and **E. Scarnati**	Pharmacological study of the cortical-induced excitation of subthalamic nucleus neurons in the rat: evidence for amino acids as putative neurotransmitters	429

W. D. Knowles, R. G. Traub, and B. W. Strowbridge	The initiation and spread of epileptiform bursts in the *in vitro* hippocampal slice	441
R. D. Traub, W. D. Knowles, R. Miles and R. K. S. Wong	Models of the cellular mechanism underlying propagation of epileptiform activity in the CA2–CA3 region of the hippocampal slice	457
J. P. Pascoe and B. S. Kapp	Responses of amygdaloid central nucleus neurons to stimulation of the insular cortex in awake rabbits	471
J. L. Dubbeldam and A. M. Visser	The organization of the nucleus basalis–neostriatum complex of the mallard (*Anas platyrhynchos* L.) and its connections with the archistriatum and the paleostriatum complex	487
M. J. Keating and C. Kennard	Visual experience and the maturation of the ipsilateral visuotectal projection in *Xenopus laevis*	519
M. Behan, C.-S. Lin and W. C. Hall	The nigrotectal projection in the cat: an electron microscope autoradiographic study	529
J. A. M. Van Gisbergen, A. J. Van Opstal and A. A. M. Tax	Collicular ensemble coding of saccades based on vector summation	541
S. I. Wiener and P. H. Hartline	Perioral somatosensory but not visual inputs to the flank of the mouse superior colliculus	557
C. W. Dempesy and D. E. Richardson	Paleocerebellar stimulation induces *in vivo* release of endogenously synthesized [^{3}H]dopamine and [^{3}H]norepinephrine from rat caudal dorsomedial nucleus accumbens	565
M. Roger and J. Cadusseau	Anatomical evidence of a reciprocal connection between the posterior thalamic nucleus and the parvocellular division of the red nucleus in the rat. A combined retrograde and anterograde study	573
C. M. Bowe, J. D. Kocsis and S. G. Waxman	The association of the supernormal period and the depolarizing afterpotential in myelinated frog and rat sciatic nerve	585
S. M. Johnson, J. T. Williams M. Costa and J. B. Furness	Naloxone-induced depolarization and synaptic activation of myenteric neurons in morphine-dependent guinea pig ileum	595
W. D. Eldred and R. E. Carraway	Neurocircuitry of two types of neurotensin-containing amacrine cells in the turtle retina	603
R. Robitaille and J. P. Tremblay	Incorporation of vesicular antigens into the presynaptic membrane during exocytosis at the frog neuromuscular junction: a light and electron microscopy immunochemical study	619
S. B. Udin	A projection from the mesencephalic tegmentum to the nucleus isthmi in the frogs, *Rana pipiens* and *Acris crepitans*	531
R. W. Lea, T. R. Hall and D. M. Vowles	Daily variations in monoamine turnover in the brain of the ring dove (*Streptopelia risoria*)	639
T. Sittiracha, E. M. McLachlan and C. Bell	The innervation of the caudal artery of the rat	647
